

Omega 3.5TM

MAGNIFIER

Fact Sheet

The Omega 3.5 is a compact and lightweight magnifier with a 9 cm acrylic lens offering 5 dioptres (2.25X) magnification. The bright daylight LEDs circling the lens provide optimum lighting for precise inspection and attention to detail - choose the amount of light needed with 4 levels of brightness. The head joint easily rotates and the adjustable arm has 2 flexible sections to allow for exact positioning with a long reach of 68 cm (27"). The arm is covered in silicon for low-maintenance and separates into 2 parts for easy storage into its carry-bag. The slim clamp takes up minimal space on your workstation and its flat side fits in-between desks. The lens can be covered when only light is needed. Carry-bag included.

FEATURES

- Compact magnifier head with 9cm (5D / 2.25X) Lightweight acrylic lens
- Arm can be separated into 2 parts for easy storage
- Rotating head joint to allow accurate positioning
- Long reach silicon covered arm with two flexible sections
- Removable, slim profile clamp
- 4 brightness levels
- Carry-bag with shoulder strap

SPECIFICATIONS

Product information

Weight	1.5 kg (3.3 lb)
Colour	White / Light Grey
Lens size	9cm (3.5")
Lens Magnification	5D (2.25X)
Lens Material	Acrylic
Maximum Reach	68cm (27")

Light output

Light source	57 SMD LEDs
Lumens	557
Lux at 15 cm (6")	7,000
Colour temperature	6,000 K
CRI	80+
Energy consumption	6.5W

Packaging information

Height	19.5cm (7.68")
Width	56.2cm (22.13")
Depth	7.8cm (3.07")
Packed weight	1.8kg (3.96 lb)
Products per master carton	6

CARRY-BAG INCLUDED
